

I think that any state that wants to adopt our policy that is fine but let them do as we are doing. Indiana doesn't do a lot for the people but Gov Frank OBannon came up with a great idea to implement. Code Amber was set up by California and it was a good idea and we adopted that for our state also. If the other States don't want to go to the extremes Why should we change for them? Let our "Do Not Call" rule stand.
